

Nr. Prot.: _____

Datë: ___/___/_____

Institution: University of Prishtina
Academic Unit: Faculty of Medicine
Study Program: General Medicine
Level of Studies: Bachelor
Number of ECTS: 360

Medical students represent the most valuable potential for the future of our healthcare system. They embark on this journey with dedication, discipline, and a deep sense of responsibility toward patients and society.

Their perspective is shaped at a time when medicine is rapidly transforming through scientific innovations, advanced technology, and new multidisciplinary approaches to treatment and prevention.

In this context, medical students not only gain theoretical knowledge and clinical skills, but also develop essential competencies such as effective communication, critical thinking, empathy, and professional adaptability. They are called to become physicians who not only diagnose and treat, but also lead, innovate, and contribute to the improvement of healthcare systems.

Their future is promising: from scientific research, clinical specializations, family medicine and emergency services. Every step they take toward the profession is a direct investment in the health and well-being of the community.

Employment Perspective for Graduates

| Nr. | Field / Possible Position | Type of Work / Role | Employment Sector in Kosovo | Opportunities for Further Studies |
