Graduates of the Doctorate in Public Health have broad employment and professional development perspectives. Their academic and research training enables:

- Engagement in higher education institutions, in academic roles and scientific mentoring;
- Participation in research centers and projects, at national and international levels;
- Contribution to the design and implementation of health policies, through strategic functions in public institutions and professional organizations;
- Leadership and consultancy in health programs, with an active role in the management and development of health systems.

The program also provides a solid basis for continuing an academic career at the postdoctoral level and for integration into professional networks and international collaborations.

Through this advanced professional profile, graduates are expected to contribute significantly to improving public health and strengthening the capacities of the national health system.
